

June 12, 1984

SDMS # 88-106550

Mr. Dwight Hoenig
Department of Health Services
2151 Berkeley Way, #119
Berkeley, CA 94704

Dear Mr. Hoenig:

I am writing this letter as a follow up to our June 6th meeting. First, I would like to remind you of our citywide meeting on Thursday June 21, 7:00 P.M. The meeting will be held at the Nevin Community Center, 598 Nevin Ave., Richmond.

During the meeting we will first update everyone on what has been done at the Summer Chemical, Drew, and Levin Richmond sites. Then we will ask you some questions about their current status, and then we will ask you to sign the enclosed dump site work agreement. This agreement basically recognizes your authority and responsibility for making sure these sites get cleaned up, but it also recognizes the right of the community to be a part of that process. We are sending you all this information in advance, so that you can review it and ask for clarification. Also, if for some reason you are unable to attend, you will then be able to authorize whoever you send in your place to sign the agreement. Some of the due dates for clean-up are still unclear, and we would like to be able to set the clean-up deadlines by the June 21 meeting.

I am also writing because at our meeting there were several documents that we were interested in getting before the June 21 meeting. They are:

- ✓ Copies of the most recent test results from Summer (prepared by Harding-Lawson)
- ✓ a copy of the payment agreement between Summer and the can companies
- ° a copy of the lab results from the test on the garden out next to the Drew dump site ✓
- ° a copy of the test results from the tests taken at Drew where the workers spilled liquids onto the ground (March 30-31, 1984) ✓
- ✓ a copy of the settlement agreement for the Parr canal site. ✓
- ✓ a copy of the most recent test results from Parr Canal site, both of the contaminated soil pile, and the surrounding soil and water ✓
- ° any results on the evaluation of the "black box" clean up process
- ✓ a copy of the proposed clean-up plan for the Parr Canal site (if it exists) ✓
- ✓ copy of the test results done on the spilled petroleum coke at Levin (both for metals & organics) (per Dick Burgard)

Thank-you for your continued cooperation. I will see you on June 21.

Sincerely,

Aurora Fernandez
